
What are AI Agents ?
Food delivery app
Zomato
Deliveroo
Doordash
Uber eats
client interface
Server
Admin interface
Customer Service Representative
Issue a new coupon code for X amount
Trigger a new delivery for the same item
Initiate a refund
Just keep a note and do nothing
Raise an escalation ticket
Tool -> Create coupons
Tool -> Initiate refund
Tool -> Escalate the ticket
understand your problem
1. A customer service representative understood your problem (by chatting on the app)
decide what is a good resolution here
2. Based on the problem they decided for a corresponding resolution (among the set of resolution options)
GPT
3. They triggered that resolution on the admin portal for you.
Agents
Triggering the resolution steps on the platform
LLMs + Tools
